

Plate mounting machine 5-AS

The 5-AS is our premium wide web plate mounting machine from the 5-series. It combines best quality parts and components with over 15 years of manufacturing experience to ensure high precision and consistency.

The machine is equipped with a servo motor, air-cylinder, high-resolution cameras, and HD monitor. Both single and multiple plate mounting can be handled quickly by simultaneous camera and cylinder movement.

The 5-series mounters come with a variety of options like automatic press-down-roller and can also be built without servo-motor and air-cylinder for simple mounting jobs.

Parameters

Sleeve width	Max. 2300 mm
Sleeve repeat	Max. 1600 mm
Standard features of 5-series	Stable machine structure
	Spot illuminator
	HD plate registration
	Adjustable shaft position
